Please provide written answers to the following questions. Use additional paper if necessary, but please limit to two pages. Attach supplemental materials (photos, maps, etc.)

1. Briefly describe your farm or ranch operation (# of cropland and/or pasture acres, types of crops and/or livestock and number of livestock); Include source of household drinking water, and source for livestock water if appropriate.

2. List the top three priorities i.e. (problems) your River Friendly Farm Environmental Assessment identified on your farm or ranch.

3. Describe the environmental or water quality problem your proposal will address.

4. Describe how you will use the cost-share funds to implement a potential solution to this problem. (Attach sketches, maps, and/or photos if appropriate.)

5. How will you know if you have achieved what you wanted to do with this project? How will you evaluate the project's effectiveness?

6. How will this impact the water quality on your farm and downstream? Why is the problem you are attempting to address important to your farm and others in your watershed?

7. Does this proposal involve rented land? Yes _____ No _____

If yes, please attach a letter from the landowner stating cooperation during the project.

8. Please list state and/or federal agencies or organizations you are working with on this project as well as for implementation of other aspects of your action plan, if appropriate. Also, state approved or applied for cost-share funds from these other sources.

For those applying for the full \$5,000 cost-share:

9. How will you share information from this project with other producers?

10. Please describe how this project fits into your general farm or ranch plan.

11. What are your future farming plans for long-term protection of water resources?

12. Are you willing to cooperate with any on-farm water quality monitoring or other environmental indicators?
